ABOUT ME

MKRUL is a Techno DJ and producer from Mexico City and one of the founding members of **XAME Records**, a Mexican label that has carved its place on the Latin American underground map. His sound is a force in motion: fast, dense, relentless, and built for the most demanding dancefloor. Rooted in **Schranz**, **Hard Techno**, **Hard Bounce**, and **Industrial**, MKRUL operates on frequencies where the body has no choice but to respond. Each set is a carefully executed narrative that fuses high-energy kick drums, distorted basslines, and mechanical textures that push the boundaries between the human and the machine. His approach goes beyond BPM: it is an auditory and sensory experience that evokes futurism, science fiction, and cutting-edge technology – with echoes of outer space that transform every night into an **interdimensional odyssey**. The atmosphere he builds on stage is not improvised – it is engineered, programmed, and detonated at the precise moment.

MKRUL doesn't play music. He builds alternate realities.
